EXPERIENCE

Software Engineer 2, Uber

📅 June 2022 – Present   📍 Bangalore

- **Role**:- Part of Uber Eats(Backend Developer), Post Delivery Experience Team, which revolves around Refund, Chargeback and Order Correction flow
- **Responsibility**:- End to End design, development, testing, experimentation and release of features with project plan, taking part of interview
- **Impact**:- handling around 1 million per day requests, converting batching to the event-based system which reduces decision-making time by 99% and converting manual payment flow to automation by making cross-team development
- **Tools & Techstack used**:- Golang, Phabricator, Git, Docstore, RPC, Cadence Workflow, Kafka, Apache Thrift, Apache Flink, Apache Pinot

Software Development Engineer 2, Flipkart

📅 Feb 2021 – Jun 2022   📍 Bangalore

- Working on feature related to event efficiency and optimization of user path for pricing and promotion
- Main Responsibility:- To be part of all stages of the software development lifecycle, starting from the requirement gathering stage till deployment (Coding and discussion taking a major amount of time).
- Received Instant Karma and Team award for having due diligence in work, as well as delivering features in a short amount of time with quality. Impact:- GMV more than 12Cr.

Software Development Engineer, Jio

📅 Nov 2020 – Feb 2021   📍 Hyderabad

- Contributed on Jio Health Hub Web Application Product
- Main Responsibility:- Take ownership of feature, gather requirements, take design decisions, code, do code review and deliver the product in the best quality within the deadline

Research Application Analyst, CLSA

📅 July 2018 – Nov2020   📍 Pune

Event Management application (Caltrain)

- Worked on implementing CRUD operation for both user and admin panel
- Delivered a single interface to manage all events, taking feedback, reminder mails as well as headcount(Register vs Waitlist) for event.
- Awarded Star Award for simplifying events managment

Corporate Communication Symphony Chat bot

- Worked on scheduling RESTful call using Java Maven, implementing command based chat bots for group messages
- Traget Audience:- all CLSA employees(2000) Benefits:- Simple way to share news with all employees, Received appreciation

SKILLS

Data Structure and Algorithms

C++   Core Java   Golang

Python   Spring Boot/Dropwizard

Junit   REST API   GRPC

MYSQL   Kafka

Database Schema Design

Event Driven Devlopmment

Multithreading   Microservice

Elasticsearch(datastore/searching)

Low Level System Design   Git

Docker & Kubernetes

PROFILE LINK

LinkedIn   **Scaler**   **Portfolio**

Github   **CodeChef**   **Hackerrank**

Hackerearth   **Codeforces**

Leetcode

ACHIEVEMENT

Instant Karma and Team award in Flipkart

Won Star Award in CLSA for Q1 2020

Open Source Contribution(**pycon 2020)**)

Won State level project competition in BE

IEEE(**Brain Controlled Wheelchair**)

EDUCATION

BE Computer Science

Pune University

📅 2014—2018   📍 Pune,IN

- First Class with Distinction (Result:-77.4) (Top 5 in College)

CBSE 12th and 10th

📅 2012 – 2014   📍 Airoli, MH

- Computer Science Major in 12th, Result:- 90.4
- 10th Result:- 93.6
